PROFILE

Bachelor of Information Technology (GPA 3.42/4.00) with hands-on experience in cybersecurity through vulnerability research, penetration testing, and bug bounty programs. Skilled in web application security testing, vulnerability assessment, and responsible vulnerability disclosure. Currently training in penetration testing fundamentals and security+ methodologies. Proven track record of identifying critical security flaws in government, financial, and international systems.

EDUCATION

Mohammad Husni Thamrin University | Information Technology | GPA: 3.42/4.00

Agt 2017 - Agt 2021

Areas of Interest: IT Support, Penetration Testing, Cyber Security

SECURITY RESEARCH & VULNERABILITY DISCLOSURE EXPERIENCE

Security Researcher & Bug Bounty Hunter | Freelance

Jul 2025 - Present

- Identified and responsibly disclosed critical vulnerabilities (XSS, SQL Injection, IDOR, BLH, Open Redirect, Insecure Design) to government agencies and major corporations.
 - Reported vulnerabilities to : DKI Jakarta Provincial CSIRT, Ministry of Trade Republic of Indonesia, PT Bank Rakyat Indonesia, Rembang Regency Government CSIRT, Maryland State Government, and NASA GOV.
 - Successfully discovered security flaws on BBC News (London, UK), PT Sentra Vidya Utama (Surabaya, Indonesia), and other production environments.
 - Utilized security tools including Burpsuite, Kali Linux, Metasploit, and OWASP methodology for comprehensive vulnerability assessments.
 - Performed manual and automated exploitation techniques including reflected or stored XSS and SQL Injection testing.
 - Documented findings according to responsible disclosure standards and regulatory compliance frameworks (OWASP, NIST).
-

ORGANIZATION

Chairperson | Faculty of Computer Science Student Executive Board

Jul 2020 – Jul 2021

- Responsible for the continuity of the organization for one term.
 - Acted as coordinator, mobilizer, and motivator for all components of the Student Executive Board for one term.
 - Coordinated with university bureaucracy.
-

TRAINING

Web Programming Basics | Dicoding

Jun 2023 – Jun 2023

- Learn HTML, CSS, and layouting techniques using Flexbox.
- Create simple website projects using semantic HTML techniques.
- Perform hardware and software troubleshooting.

Database Administration Fundamental | CKI Prakerja

Jun 2023 – Jun 2023

- Design database structures and schemas according to system requirements.
- Create and implement databases using DBMS.
- Perform database administration including user management, privileges, and performance optimization.
- Manage and manipulate data using queries (SQL) for operational and reporting needs.
- Perform database backup and restore procedures to ensure data security and recovery.

IT Support | Digitalent

Apr 2024 – Jul 2024

- Learn the basics of technical support, computer networks, and system administration.
- Optimize IT infrastructure services and network security practices.

Basic Penetration Testing | ID-Networkers

Nov 2025 – Nov 2025

- Understanding cybersecurity fundamentals including DAD & CIA, Penetration Testing Process, Cyber Kill Chain, and MITRE ATT&CK.
- Study testing planning and scope determination (Rules of Engagement, Scope of Work, Regulatory Compliance).
- Master Information Gathering with Google Dorking Techniques, Passive & Active Scanning using tools such as whois, Nmap, Nesus, and OpenVAS.
- Performing system exploitation including XSS techniques (reflected, stored), SQL Injection (manual and automation), and Credential Stuffing.
- Understanding testing standards and methodologies such as OWASP, NIST, and OSSTMM.
- Possessing strong prerequisite knowledge including Network Fundamentals (OSI Layer, TCP/IP, Common Services) and Linux Fundamentals (Command Line, Note Keeping).
- Setting up a lab environment for penetration testing practice using Kali Linux, Metasploit, and DVWA.

CompTia Security+ | ID-Networkers

Nov 2025 – Nov 2025

- Threats, Attacks, Vulnerabilities: Analysis of social engineering techniques, types of attacks, and vulnerability assessments.
- Architecture and Design: Designing secure environments, including cloud, virtualization, and cryptography concepts.
- Implementation: Implementation of secure protocols, network security solutions (wireless/mobile), and identity and access management.
- Operations and Incident Response: Incident investigation procedures and use of security tools.
- Governance, Risk, and Compliance (GRC): Implementation of controls, risk management, and regulatory compliance.

ACHIEVEMENTS

Vulnerability Disclosure Appreciation | Government CSIRT

- **DKI Jakarta Provincial CSIRT (Jakarta, Indonesia)** : Reported **Broken Link Hijacking (BLH)** vulnerabilities.
- **Ministry of Trade Republic of Indonesia (Jakarta, Indonesia)** : Reported **Cross-Site Scripting (XSS)** vulnerabilities.
- **Rembang Regency Government CSIRT (Central Java, Indonesia)** : Identified and reported **HTML Injection**, **Insecure Direct Object References (IDOR)** and **Sensitive Data Exposure** vulnerabilities.
- **PT Bank Rakyat Indonesia (Jakarta, Indonesia)** : Successfully discovered and reported **SSRF** on production environments.
- **Maryland State Government (Maryland, USA) (Bugcrowd)** : Successfully identified and reported **Broken Link Hijacking (BLH)** flaws on state-owned digital assets.
- **National Aeronautics and Space Administration (NASA) (Bugcrowd)** : Successfully identified and reported **Broken Link Hijacking (BLH)** flaws on state-owned digital assets.

Security Research & Bug Bounty Achievements

- **PT Sentra Vidya Utama (Surabaya, Indonesia)** : Successfully discovered and reported **Open Redirect** on production environments.
- **BBC News (London, UK)** : Successfully discovered and reported **Insecure Design** on production environments.

SKILL

- **Cybersecurity** : Penetration Testing, Vulnerability Assessment, Web Application Security Testing, Responsible Disclosure, Reconnaissance.
- **Security Tools** : Burpsuite, Wazuh, Kali Linux, Metasploit, Wireshark, Nmap, Nessus, DVWA.
- **Programming** : HTML, CSS, PHP, JavaScript.
- **Methodologies & Frameworks** : OWASP, NIST, Cyber Kill Chain, MITRE ATT&CK.
- **IT Support** : Troubleshooting, Network Administration, System Security, SAP.
- **Soft Skills** : Problem Analysis, Technical Troubleshooting, Communication, Analytical Thinking, Leadership, Teamwork.
